About SKYFROG™

Skyfrog Co., Ltd., we are the market leader in implementing Transportation Management System (TMS) to our customers. Our SKYFROG™ TMS is developed by our internal developers team and has been implemented to more than 100 clients in Thailand and abroad. Many of them are public listed companies or big private corporations, such as TOA, Dohome, Hmpro, Pepsico, P&G, SiS Distribution, Ricoh, Hafele, Linfox, M-Senko, KerryApex, KCG, etc. Features in our TMS covers all operations from Planning (Vehicle Route Planning Optimization), Execution (Mobile Application for Drivers with Electronic Proof-of-Delivery), Tracking & Monitoring (Real-time GPS Tracking, Data Analytics Dashboards, and Reports).

Our TMS can seamlessly integrate with many ERP & WMS, such as SAP S/4 HANA, SAP B1, Microsoft Dynamics 365, Infor, Manhattan WMS, etc. Our SKYFROG™ TMS has been proven by many customers that it can help reducing transportation cost by more than 10-20%, and some of them can break-even their investments within only 3-6 months.

***Skyfrog Co., Ltd** is trusted by many customers because of our reasonable price and excellent service. Our customers always recommend our products and services to others. Some customers are also welcomed those who are interested in SKYFROG to visit their site, and see how they operate with our SKYFROG™ system.*

YOUR BEST PARTNER FOR LOGISTICS TECHNOLOGY

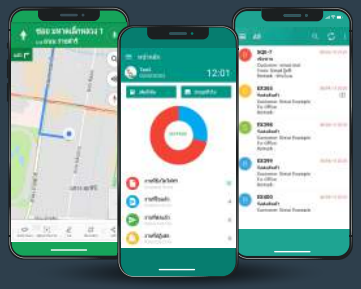
SKYFROG TMS WORKFLOW



TMS with Vehicle Route Planning, Proof-of-Delivery & GPS Tracking on Mobile

Skyfrog system: Proof-of-Delivery + GPS Tracking Solution on Mobile is a software for logistic management, EPOD and GPS Track via smartphone.These are our main functions:

Fleet & Route Optimization
High-efficiency logistics auto-route management by SKYFROG Vehicle Route Planning. (SKYFROG VRP)

Installing GPS
GPS Tracking System allow users to track the location informtion in real-time via SKYFROG Web Portal.

Proof-of-Delivery
SKYFROG Proof-of-Delivery helps capturing edge information back to cloud in real-time.

Communication
Communicate your team with text, image or sound and group communication via Internet.

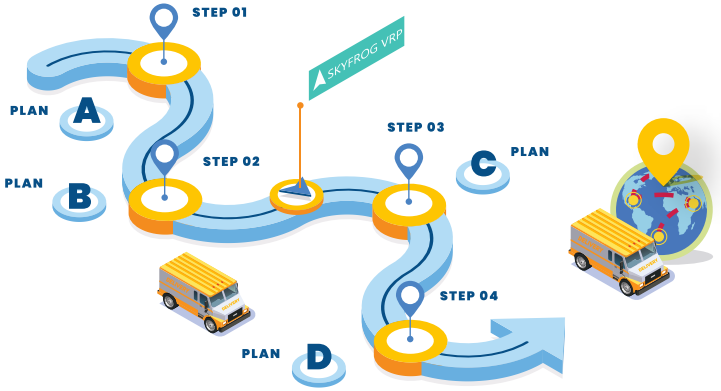
Data Anlytics & Dashboards
SKYFROG Business Intelligence shows insights of your business for better efficency imprpvement.

Cloud Technology

SKYFROG Cloud enable customers to quickly deploy the system with very little initial investment.

The Skyfrog cloud based service, web browser application that user no need to invest in Servers and Infrastructures, safe cost and quickly ready to use. Another advantage of Web Application is each user's device can use this system via Web Browser e.g. Google Chrome or Internet Explorer without installing any additional program.

Fleet & Route Optimization



SKYFROG VRP
(Vehicle Route Planning)

The system to helps logistics operators or manufacturers. Distribute products from factories or warehouses to customers and stores (domestic distribution), including B2B and B2C. This may encounter complex planning or high-cost fixed route planning problems and may not achieve the expected efficiency.

SKYFROG VRP helps with automatic planning in two dimensions, both vehicle planning (Vehicle Planning) and planning the best vehicle route (Dynamic Route Optimization)

Many companies have proven that this can reduce fuel costs by 10%.
Reduce the required number of vehicles by 8%
The cost savings are approximately 100,000 Baht per month, which has been cost-effective since the first year of using the system.

Good Results

Save Cost Save Time Improve Efficency

Is an average figure. However, Cost Saving depends on industry and complexity of shipping and distribution.
